

Goals of Education for Saskatchewan (1985)

(based on *Directions*, 1984)

(reaffirmed in *High School Review Report*, 1994)

(reaffirmed in *Actualization of Core Curriculum*, 1999)

Goals of education in Saskatchewan should direct efforts to develop the potential of all students in the province. Education should affirm the worth of each individual and lay the foundation for learning throughout life.

Students benefit from exposure to learning in a variety of situations. Attainment of the goals is a venture the school shares with the student, the home, the church, and the community. Although the degree of school responsibility will vary from community to community, the school has some responsibility for each goal.

A body of knowledge and a range of skills and attitudes are necessary to function in a changing world. It is intended, then, that education will enable Saskatchewan students to do the following to the best of their abilities:

BASIC SKILLS

1. Read, write, and compute,
2. Acquire information and meaning through observing, listening, reading and experiencing.
3. Process information through intellectual and technological means.
4. Solve problems by applying basic principles and processes of the sciences, arts, and humanities.
5. Communicate ideas through written and spoken language, mathematical symbols, and aesthetic expression.
